## Consulting and Solutions

### All Around

### Digital Company Data

With our consulting teams including engineering, computer science and business experts, we consult and service our customers in every aspect concerning data management and software development. Our services encompass compact systems for small and medium sized companies up to complex solutions for exchange-listed corporations.

DataSquare is part of a business group in the area of engineering and IT consulting. In addition to our main office in Hamburg, we have branch offices in Wolfsburg and Pforzheim in order to be closer to our customers.

#### We secure the access to your data

For every company it is absolutely essential to always have an overview of all company data in addition to controlling the connections between relative processes, methods, work flows and tools. Thereby, not only every employee but also suppliers and subcontractors must be guaranteed absolute access to data and processes.

In reality there are often problems that disrupt the optimal use of digital data which limit effective working, or even rendering it impossible:

- Impracticable interfaces
- System unavailability**
- Ineffective processes**
- Incomplete training
- Poor integration depth**
- Limited support
- Lacking tools**

DataSquare's approach: At the center of our work is always the digital company data of our customers. We secure the access to this information by optimizing business processes, workflows, methods and tools. In this process, we are not only concerned with the appropriate solution and its integration into the existing environment but also providing the best possible user-ability.

DataSquare

- analyses
- consults
- offers solutions
- develops tools
- sells software products, modifying and implementing them
- offers service, support and training

And therefore closes the gap between the user and their data.

#### Our experience is used multilaterally

Originally in engineering – an area where we made a name for ourselves through successfully realized projects and long customer relationships.

Today, we convert this experience competently and profitably into further branches. In the last few years we have conducted projects in the following areas:

##### Industry

- Automotive
- Energy supplier
- Air and space
- Factory machinery
- Shipbuilding

##### Financial services

- Banks
- Insurances

##### Medical services

- Hospitals

#### Our solutions for your data

##### Data management & process control / product lifecycle management

With DataSquare your company and product data is always insight optimally connected to your business processes.

##### Technical documentation / product visualization

DataSquare offers solutions for optimizing the product documentation process.

##### Data analysis / data visualization

DataSquare supports you during the analysis and visualization of complex data structures.

##### IT services

DataSquare specialists analyze the situation in your company and offer individual customized solutions in the area of consulting, software development, services, training and support.

We are a member of tekomp, Europe's largest professional association for technical communication and information management ([www.tekom.de](http://www.tekom.de))
