Aras PLM Essentials 11
Aras Training Seminar Description

Course
Aras PLM Essentials 11

Length
3 days

Format
Interactive combination of lectures, exercises, and labs

Attendees
Users that need to evaluate and understand how to use the Product Lifecycle Management applications included with Aras Innovator.

Description
This 3-day hands-on training course combines lectures, exercises, and labs to provide an introduction to the Aras Innovator Product Engineering and Program Management applications. Attendees will learn how to create and manage the revisions and release of Parts and Documents using the Aras Product Engineering application and define Project Templates and Schedules using Aras Program Management. Students will also share design ideas and drawing markups using Aras Secure Social Visual Collaboration (SSVC) and the Aras Flow application. Students will be introduced to Self Service Reporting and using Microsoft Office Connector.

Objectives
At the end of the course, participants will be able to:

- Navigate in Aras Innovator and perform business item queries

- Set up new user accounts, organizational groups and teams

- Create new Part and Document items and upload files

- Create and manage Part Bill Of Materials (BOM)

- Release and Revise Parts and Documents using an ECO/DCO

- Design Self Service Reports including data, charts, graphs, and summary sections

- Collaborate and View Part and Document content using Secure Social Visual Collaboration and the Aras Flow App

- Create a Project Template and execute a Project Schedule

- Manage Microsoft Office files in Innovator directly from the Aras Office Connector Add-on

Prerequisites
Attendees should have an understanding of computer systems and enterprise applications.
