

Seminar Topic

Project Program Management

Length

1 day session

Format

Interactive combination of overview discussions and exercises

Description

The workshop combines hands-on exercises, overview presentations, and discussions to provide an understanding of how the Aras Program Management solution supports project management for different business strategies and corporate environments. Participants learn how the solution applies the PMI project management principles to address specific business requirements and will understand the possibilities and capabilities available for better Phase-Gate program management and project collaboration.

Objectives

At the end of the course, participants will understand:

- How phase-gate program management can be applied in your business
- How templates simplify scheduling & project initiation and standardize different project processes
- How team members can collaborate online on project activities and deliverables
- How project managers can eliminate status collection and update activities
- How dashboards and reports provide progress status and project portfolio visibility

Agenda

Topics	
Phase-Gate Program Projects	Project Team Collaboration
Project Team Members & Security Permissions	Progress and Status Rollups
Project Templates and PMI WBS	Document & File Attachments
Scheduling & Resource Assignment	Resource Management
Milestones & Deliverables	Dashboards and Reporting
