

Enhancements in Aras Innovator 12.0 SP18

Background page configurable by Identity

- Administrators can now use CUI to configure the set of tiles displayed on the Aras Innovator background page, the screen which is displayed by default after the user logs in, for different Identities. These tiles provide users with quick access to their searches, as well as other vital information like their InBasket tasks, Discussions, and dashboards.

Ability to save and restore multiple sets of grid layouts in main search grids

- Users can now save and restore multiple sets of grid layouts for all ItemTypes in the main grid, including visible columns, column order, column width, and frozen columns.

1.1.1 Issues Fixed in Aras Innovator 12.0 SP18

Table 1: Framework

Issue #	Description
F-000035	The set of tiles displayed on the background page can now be configured by Identity using CUI.
F-003833	Users can now save and restore multiple sets of grid layouts, including visible columns, column order, column width, and frozen columns.
F-004600	Saving a Favorite Search and using an already existing name will now prompt the user whether they want to overwrite the previous definition.
I-030382	Fixed an issue where properties on a form may not display properly. This specifically corrects an issue with the settings in Office Connector.
I-031809	Fixed an issue where in some cases clicking the Refresh command within an Item form would cause an unclaimed item to be become claimed.
I-031985, 092025	Clicking the "Current Time" button in the Date picker correctly sets the corporate time value, when Corporate Time Zone is enabled where, previously, it might have incorrectly set the local time.
I-032140, I-032144, I-032166	Fixed several issues in which search criteria were lost after conversion from AML Search Mode to Advanced Search Mode.
