Its been a busy month for the Aras Community with lots of exciting events including the move to our new office campus at [Brickstone Square!](#)

DEMO RECORDING - FMEA Risk Management Solution

Risk management is critically important in today's business environment and the most widely used technique for product risk is the Failure Mode & Effects Analysis [FMEA].

In some industries like automotive, aerospace & defense, and medical devices FMEAs and control plans are required for compliance by standards such as ISO 13485 and EN ISO 14971.

Members of the Aras community are increasingly inquiring about the benefits of using the Aras database-driven software solution for FMEAs (as opposed to desktop systems with limited functionality).

To learn more and see the Aras FMEA solution in action view the quick on-demand recorded demo.

WEBCAST - FMEA Risk Management for Today's Business Environment

Earlier this month Aras sponsored a webcast on applying FMEA risk management to mitigate product risks and reduce product warranty recalls and liability.

Angelo Scangas, President of [QSG](#) and Certified AIAG, IAOB and RAB-Lead Auditor, provided an overview of how to apply FMEAs to ensure both compliance and effective business risk analysis.

Aras Presents at Microsoft Worldwide Partner Conference

Earlier in July Microsoft held the 2007 [Worldwide Partner Conference](#) in Denver Colorado. Over 10,000 people from more than 7,000 partner companies participated.

One of the most anticipated new products that will be released by Microsoft in the coming year is Windows Server 2008 (formerly known as Longhorn).

Aras was selected as the representative software solution provider to present with the Windows Server 2008 team out at the conference.

We shared with the audience the advantages of the Microsoft enterprise open source approach and the benefits customers realize by using the Windows Server platform with the Aras Innovator solutions. With Aras companies achieve business results without spending money on application software because the Aras solutions are available for no charge (FREE).

UPCOMING Discovery Seminars & Training Sessions

Discovery seminars help you explore the possibilities of how Aras solutions can support your company's specific strategic initiatives, and training sessions provide you and your team with the education needed for success with the Aras Innovator solutions.

Both types of sessions combine hands-on exercises, overview presentations, and discussions to provide an in-depth understanding of the Aras solutions.

Space is limited so make plans & register now.

Upcoming Training Sessions - Boston, MA

Aug 20 - Aras Innovator Administration

Aug 22 - Aras Innovator Workflow

Aug 23 - Aras Innovator Developer & API

Upcoming Discovery Seminars - Boston, MA

Aug 27 - Project Program Management

Aug 28 - FMEA Quality Planning

Aug 29 - Configuration & Change Management
