Exciting news as we head into the end of 2008... there are more events & webcasts this month and new community project contributions that benefit everyone.

And with the economic downturn occurring, the open approach from Aras makes smart business sense for your company... No license fees means that unlimited users are enabled without incremental user license costs!

### REGISTER NOW - Aras Community Network: Taiwan Events - December 16 & 17

The next Aras Community Network events will be held in Taiwan during December. There will be two (2) sessions: Taichung and Taipei.

The events are sponsored by Microsoft, National Formosa University, Cardinal Tien College, and Broadway Consulting Services.

Come and learn about the Aras open model for advanced PLM solutions and hear from leading companies using Aras.

Find out how Aras is applied as a comprehensive **Food Traceability System** that can track ingredients at every step in the supply chain for quality and integrity.

Hear how Aras is used for PLM in High Tech Electronics for global new product development and introduction.

Make new connections, share, and much more.

**Session 1 Date:** Tuesday, December 16, 2008

**Location:** National Formosa University in Taichung

**Session 2 Date:** Wednesday, December 17, 2008

**Location:** Cardinal Tien College in Taipei

Sessions are **Free to Attend** and registration is required because space is limited, so sign-up now!

## FEATURED PROJECT - German Language Pack

---

Featured this month is the German / Deutsch language pack. By adding this localization package to your Aras Innovator installation your company will have multiple languages simultaneously available for users based on the language of each user's Windows operating system.

For example, people in the US will see the Part Master in English and at the exact same time users in Germany will see German... and if you load the Chinese language pack people in China will see Chinese.

Aras Innovator supports single-system multi- language internationalization capabilities for global collaboration.

Languages are stored as data in Microsoft SQL Server. This simplifies the development and sharing of language packs by eliminating external resource files and getting rid of the need to compile code before using solution translations.

Now, your company can avoid miscommunications and users around the world can collaborate more effectively by using Aras.

We'd like to thank Freudenberg DS in Germany for generously contributing to this make this translation possible. Once again participation enhances the opportunity for all corporate community members!

## WEBCAST - Live Demo of PLM for Microsoft Dynamics

---

This week we will be conducting a **Live Webcast** overview and demo of the Aras PLM solution for Microsoft Dynamics.

You will see how PLM can extend your Microsoft ERP solution (AX, NAV, GP) to provide online engineering change workflows, engineering document management, browser-based supplier corrective actions (SCAR / CAPA), and much more.

This webcast is perfect for companies that need PLM capabilities and are using or considering one of the Microsoft Dynamics ERP systems.

In the webcast you will:

- Learn about the Aras PLM solution for Microsoft Dynamics
- See a live demonstration of the proven Aras solution for PLM
- Find out how your company can take advantage of the PLM for Dynamics from Aras
