### **Send Us Your Comments**

Aras Corporation welcomes your comments and suggestions on the quality and usefulness of this document. Your input is an important part of the information used for future revisions.

- Did you find any errors?
- Is the information clearly presented?
- o Do you need more information? If so, where and what level of detail?
- Are the examples correct? Do you need more examples?
- What features did you like most?

If you find any errors or have any other suggestions for improvement, indicate the document title, and the chapter, section, and page number (if available).

You can send comments to us in the following ways:

If you would like a reply, provide your name, email address, address, and telephone number.

If you have usage issues with the software, visit http://www.aras.com/support/

### **Document Conventions**

The following table highlights the document conventions used in the document:

Table 1: Document Conventions

| Convention                            | Description   |  |
|---------------------------------------|---|--|
| Bold                                  | This shows the names of menu items, dialog boxes, dialog box elements, and commands.<br>Example: Click <b>OK</b> .  |  |
| Code                                  | Code examples appear in courier text. It may represent text you type or data you read.  |  |
| Yellow highlight                      | Code with yellow highlight is used to draw attention to the code that is being indicated in the content.  |  |
| Yellow highlight<br>with red text     | Red color text with yellow highlight is used to indicate the code parameter that needs to be changed or replaced.   |  |
| Italics Reference to other documents. |   |  |
| Note:                                 | Notes contain additional useful information.  |  |
| Warning                               | Warning contains important information. Pay special attention to information highlighted this way.  |  |
| Successive menu choices               | Successive menu choices may appear with a greater than sign (>) between the items that you will select consecutively.<br>Example: Navigate to <b>File</b> > <b>Save</b> > <b>OK</b> . |  |
|                                       |   |  |

### **1 Platforms & Standards**

Aras<sup>®</sup> is committed to standard Internet protocols and common platforms. Aras Innovator<sup>®</sup> provides businesses with flexible configuration options to manage based on tomorrow's market requirements not yesterday's decisions.

#### **1.1 Client Specifications**

| Operating System    | Supported Browser    |
|---------------------|----------------------|
|                     | Edge                 |
|                     | Internet Explorer 11 |
| Vindows 10          | Firefox 45 ESR       |
|                     | Firefox 38 ESR       |
|                     | Chrome 55 (Minimum)  |
|                     | Internet Explorer 11 |
| Windows 8.1         | Firefox 45 ESR       |
| VVINdows 8.1        | Firefox 38 ESR       |
|                     | Chrome 55 (Minimum)  |
|                     | Internet Explorer 11 |
| Windows 7           | Firefox 45 ESR       |
| Windows 7           | Firefox 38 ESR       |
|                     | Chrome 52 (Minimum)  |
|                     | Firefox 45 ESR       |
| OS X 10.12 (Sierra) | Firefox 38 ESR       |
|                     | Chrome 55 (Minimum)  |

#### **1.2 Innovator Server Specifications**

| Operating System                 | Web Services | Framework            |
|----------------------------------|--------------|----------------------|
| Microsoft Windows Server 2016    | IIS 10       | Microsoft .NET 4.5.2 |
| Microsoft Windows Server 2012 R2 | IIS 8        | Microsoft .NET 4.5.2 |
| Microsoft Windows Server 2012    | IIS 8        | Microsoft .NET 4.5.2 |
| Microsoft Windows Server 2008 R2 | IIS 7.5      | Microsoft .NET 4.5.2 |

#### **1.3 Vault Server Specifications**

| Operating System                 | Web Services | Framework            |
|----------------------------------|--------------|----------------------|
| Microsoft Windows Server 2016    | IIS 10       | Microsoft .NET 4.5.2 |
| Microsoft Windows Server 2012 R2 | IIS 8        | Microsoft .NET 4.5.2 |
| Microsoft Windows Server 2012    | IIS 8        | Microsoft .NET 4.5.2 |
| Microsoft Windows Server 2008 R2 | IIS 7.5      | Microsoft .NET 4.5.2 |

#### **1.4 Database Specifications**

| Operating System                 | Database  |  |
|----------------------------------|---|--|
| Microsoft Windows Server 2016    | <ul> <li>Microsoft SQL Server 2016</li> <li>Microsoft SQL Server 2014</li> <li>Microsoft SQL Server 2012</li> <li>Microsoft SQL Server 2008 R2</li> </ul> |  |
| Microsoft Windows Server 2012 R2 | <ul> <li>Microsoft SQL Server 2016</li> <li>Microsoft SQL Server 2014</li> <li>Microsoft SQL Server 2012</li> <li>Microsoft SQL Server 2008 R2</li> </ul> |  |
| Microsoft Windows Server 2012    | <ul> <li>Microsoft SQL Server 2016</li> <li>Microsoft SQL Server 2014</li> <li>Microsoft SQL Server 2012</li> </ul>                                       |  |

|                                  | Microsoft SQL Server 2008 R2 |
|----------------------------------|------------------------------|
|                                  | Microsoft SQL Server 2016    |
| Microsoft Windows Server 2008 R2 | Microsoft SQL Server 2014    |
| Microsoft Windows Server 2008 R2 | Microsoft SQL Server 2012    |
|                                  | Microsoft SQL Server 2008 R2 |

### **2** Recommendations and Requirements

To optimize Aras Innovator® performance Aras ® Corporation recommends the following software and hardware components. Please keep in mind that the minimum requirements are listed as a baseline and following recommendations ensures system performance. Recommendations also assume that Aras Innovator will be running with minimum additional network activity. Other active applications on the network or on the PCs will affect performance and must be taken into account when selecting hardware.

| Database Server    |  |
|--------------------|--|
| Database Engine    | Microsoft SQL Server 2008 R2, Microsoft SQL Server 2012, Microsoft SQL Server 2014, or<br>Microsoft SQL Server 2016  |
| Network OS         | Any supported O/S platform for the selected database   |
| CPU                | Recommend for up to 1000 users 32 logical cores  |
|                    | Minimum for up to 250 users 16 logical cores   |
| Memory             | Recommend for up to 1000 users 64 GB RAM   |
|                    | Minimum for up to 250 users 32 GB RAM  |
| HDD                | Recommend RAID using 4 to 6 physically separate disks (RAID 0/1) – Striping data across disks improves performance   |
|                    | NOTE: NEVER use OS based mirroring of the database – The OS should be on a separate disk from the Database   |
|                    | It is recommended that the Operating system and virtual memory file be separated from the SQL server data and log files. Optimal SQL server performance is achieved when SQL server log files also reside on a separate physical disk. The following recommended guideline is a good price/performance compromise: |
|                    | Operating System disk(s) – could be RAID 1   |
|                    | SQL Server data files (RAID 5 array, minimum of 3 drives)<br>SQL Server log files (RAID 1 array, 2 drives)   |
| •                  | There should be 1 temp database per physical core up to but not more than 8 temp databases<br>Disks for data and log files should be higher than 1000 IOPS – Disk speed impacts<br>performance of concurrent users   |
| Application Server |  |
| Network OS         | Windows Server 2008 R2, Windows Server 2012, Windows Server 2012 R2, or Windows Server 2016  |
| Web Server         | IIS version 7.5 or higher  |
| .NET               | Microsoft .NET Framework 4.5.2   |
| CPU                | Recommend for up to 1000 users 8 physical cores and 16 logical cores   |
|                    | Minimum for up to 250 users 4 physical cores and 8 logical cores   |
| Memory             | Recommend for up to 1000 users 32 GB RAM   |
|                    | Minimum for up to 250 users 16 GB RAM  |
| HDD                | Recommend 2.0 GB free disk space – Aras Innovator will use approximately 400 MB for the production instance  |
| Connectivity       | Internet connection suggested for online support and update downloading – recommend VPN to support remote access   |
| Server Clustering  | Recommend introducing additional app servers in high availability cluster if more than 1000 users  |

| Vault Server      |  |
|-------------------|--|
| Network OS        | Windows Server 2008 R2, Windows Server 2012, Windows Server 2012 R2, or Windows Server 2016  |
| Web Server        | IIS version 7.5 or higher  |
| .NET              | Microsoft .NET Framework 4.5.2   |
| CPU               | Recommend for up to 1000 users 4 physical cores and 8 logical cores  |
|                   | Minimum for up to 250 users 2 physical cores and 4 logical cores   |
| Memory            | Recommend for up to 1000 users 16 GB RAM   |
|                   | Minimum for up to 250 users 8 GB RAM   |
| HDD               | Recommend RAID array – Vault disk capacity planning should consider 2-year growth of total file space consumption.                       |
|                   | NOTE: End-user predictions of Vault Server data volume are typically under estimated and quickly surpassed                               |
|                   | Recommend 1.0 GB free disk space for the OS and software – Aras Innovator will use 50MB  |
|                   | Disks for storing vaulted files should be higher than 500 IOPS – Disk speed impacts performance of concurrent users                      |
| Conversion Server |  |
| Network OS        | Windows Server 2008 R2, Windows Server 2012, Windows Server 2012 R2, or Windows Server 2016  |
| Web Server        | IIS version 7.5 or higher  |
| .NET              | Microsoft .NET Framework 4.5.2   |
| CPU               | Recommend 8 physical cores and 16 logical cores  |
|                   | Minimum 4 physical cores and 8 logical cores   |
| Memory            | Recommend 32 GB RAM  |
|                   | Minimum 16 GB RAM  |
| HDD               | Disks for checking out files to be converted should be higher than 500 IOPS – Disk speed impacts conversion throughput                   |
| Application       | The Conversion Server recommendations are subject to change based on the converter application requirements being executed on the server |
| Clients           |  |
| Client OS         | Windows 7, Windows 8.1, Windows 10, or Mac OS X 10.12 (Sierra)   |
| Browser           | Firefox 38 ESR, Firefox 45 ESR, Internet Explorer 11, or Google Chrome (Minimum version 20)  |
| CPU               | Minimum requirement CPU 2.0 GHz or higher  |
| Memory            | Recommend 8 GB RAM   |
|                   | Minimum requirement 4 GB RAM   |
| HDD               | Minimum requirement 80 MB free disk space for Internet temporary folders   |
| Monitor           | Recommend 1280 x1024 monitor and adapter – Minimum requirement 1024 X 768  |

#### Network

Recommend 100 mbps network between Application Server and Clients Recommend dedicated sub-LAN of minimum 1.0 GB between the Application Servers and Database Server

Backup Equipment Aras Corporation recommends investment in a reliable backup system.

### **3 Hardware Configuration**

Aras Innovator<sup>®</sup> offers numerous configuration options designed to meet your business requirements and technology environment with the ability to scale to meet future needs. Migrating from one configuration to the next is designed to be straightforward.

| Option 1: Single Server<br>250 Users<br>Combined Database, File Vault,<br>and Web / App Servers   | D                | INNOVATOR |                    |
|---|------------------|-----------|--------------------|
|   | CPU              | RAM       | HDD <sup>1,2</sup> |
| Single Combined Server  | 16 Logical Cores | 32 GB     | 1000 IOPS          |
| <sup>1</sup> HDD capacity requirements depend directly on the CAD, EDA and document formats employed in conjunction with the aggregate file count and total size. |                  |           |                    |

<sup>1</sup> HDD capacity requirements depend directly on the CAD, EDA and document formats employed in conjunction with the aggregate file count and total s <sup>2</sup> Disk speed is recommended for the Database Server Tier. Please see Section 2 "Recommendations and Requirements" for more details

#### **Option 2: Separate Servers** INNOVATOR 1000 Users ★ ▲ Separate Database, File Vault, Database Web / App Conversion Vault and Web / App Servers CPU RAM HDD Database Server <sup>2</sup> 64 GB 1000 IOPS 32 Logical Cores 4 Physical Cores with 8 Web / App Server 32 GB Logical Cores 4 Physical Cores with 8 Vault Server <sup>1</sup> 16 GB **500 IOPS** Logical Cores 8 Physical Cores with 16 **Conversion Server** 32 GB 500 IOPS Logical Cores <sup>1</sup> HDD capacity requirements depend directly on the CAD, EDA and document formats employed in conjunction with the aggregate file count and total size. <sup>2</sup> Please see Section 2 "Recommendations and Requirements" for more details

#### **Option 3: Distributed Servers**

1000 Multi-site Users Multiple Vault and Conversion, Single App and Database Server

|                              | CPU                                       | RAM   | HDD       |
|------------------------------|---|-------|-----------|
| Database Server <sup>2</sup> | 32 Logical Cores                          | 64 GB | 1000 IOPS |
| Web / App Server             | 4 Physical Cores with 8<br>Logical Cores  | 32 GB |           |
| Vault Server <sup>1</sup>    | 4 Physical Cores with 8<br>Logical Cores  | 16 GB | 500 IOPS  |
| Conversion Server            | 8 Physical Cores with 16<br>Logical Cores | 32 GB | 500 IOPS  |

<sup>1</sup> HDD capacity requirements depend directly on the CAD, EDA and document formats employed in conjunction with the aggregate file count and total size. <sup>2</sup> Please see Section 2 "Recommendations and Requirements" for more details

#### **Option 4: Development Server**

Used for Customization, Testing, or Training Environments

|  | CPU             | RAM    | HDD  |
|--|-----------------|--------|------|
| Single Development Server <sup>1</sup> | 4 Logical Cores | 8.0 GB | 4 GB |
| 1                                      |                 |        |      |

A development server is not meant to be an environment for a large number of concurrent users, but rather is meant to be an all-in-one, self-contained environment for developing and testing new applications before deploving them to the production environment.
