Enhancements in Version 10.0 SP1

- **Upgrade Services**

  The primary focus of the release is to introduce standard Upgrade Services process available to Premier Subscribers.

- **Configurable Grids**

  Support for the configurable grid was introduced for the HTML5 client on all client platforms.

- **Updated User Interface Style for Just Ask Innovator**

  The user interface for Just Ask Innovator now has a modern clean style, with familiar elements similar to the main user interface for Aras Innovator
