

## Enhancements in Aras Innovator 12.0 SP6

### Access Control - MAC

- Mandatory Access Control Policy functionality was enhanced to work with Derived Attributes, which enables access restriction rules based on properties on sets of related items instead of just on the accessed item and user. Consult the "Aras Innovator - MAC Policies" documentation for more information.

## Issues fixed in Aras Innovator 12.0 SP6

Issue #	Description
080515	The Issue related to incorrect behavior in the Tree Grid View with the display of the Expand button ('+', '-') has been fixed. The Expand/Collapse button now works correctly.
F-000601	The xClassification Tree ItemType view has been updated to conform to the style of the new user interface.
F-000603	The Query Definition ItemType view has been updated to conform to the style of the new user interface.
F-001717	When in split-screen mode, the vertical divider can now be moved to change the relative sizing between the two parts of the screen.
F-001946	Introduced the ability to configure a Graph View to be opened from a sidebar tab on an item.
I-001094	Updated main search grid context menu localization in German.
I-008044	Enterprise Search no longer displays date facets with zero counts.
I-010722	Text elements that are copied are now pasted correctly in TDF-enabled Items in Internet Explorer.
I-012653	Fixed error that would allow The Clear Search Criteria button to delete disabled criteria specified by an OnSearchDialog event in the modal search dialog.
I-013199	The Find Tool in the Technical Documentation Framework now identifies text from Search Operations within Item Property Document Elements.
I-013820	Pressing Ctrl+F now displays the Find Tool panel when focus is in Technical Documentation Framework enabled Item editor in Chrome.

Issue #	Description
I-013837	Corrected an issue in which the "Show All" link would disappear for the "Current" facet in Enterprise Search if there was more than one option available.
I-014053, 078624	Corrected an issue while using Chrome in which clicking the Print button in the SSVc markup toolbar would result in a blank print dialog.
I-014190	Content within Item Properties is now rendered properly in published XML content when publishing from the Technical Documentation Framework.
I-014697, 081700	The space character is now supported for defining new class names in the "Classification" dialog.
I-014698, 079188	Using the [+] button from inside the Workflow Dialog to add an Activity Assignment in an already-created Workflow Process now works correctly.
I-014699, 074565	Corrected an issue that could cause week number to calculate incorrectly in date dialog.
I-014719, 057939	Fixed an issue where adding a search criteria via OnSearchDialog on a property with data type 'Item', and then clearing the search criteria, resulted in an error message.
I-014722, 060558	The user interface will disable editing of related items in the relationship grid if the related item is is_current=0. This was previously possible in use cases where the relationship behavior is "Fixed".
I-014727, 082702	Fixed an issue where clicking on a List hyperlink in the Property Data Source column returned an error instead of opening the List.
I-014739	Pasting content, copied from MS Office documents, now adds the Text properly without additional XML tags.
I-014875	Icons are displayed correctly on Graph View cards.
I-014949, 081637	Updated Enterprise Search to correct cases in which Search using wildcards might not display all matching keywords.
I-015107	Fixed bug with search, where total results count was not refreshed when new search criteria were applied and all items were shown on the first page.
I-015266	Discard Changes dialog no longer appears when attempting to close a TDF-enabled Item after running search with the Find Tool.

<b>Issue #</b>	<b>Description</b>
I-015277	Fixed an issue in which Enterprise Search could display fewer items than expected after performing an Internal Reindex.
I-015441	Corrected an issue in which the Control Panel buttons would not display for an Administrator in the Enterprise Search Internal Reindex option when using either Firefox ESR 60 or 68.
I-015702, I-014725, 078353, 081579	The "Permissions limited" warning is properly shown on search results, when appropriate.
