How to get the Most from ACE2012

▶ Networking

- Meet a collaborator for your next project
- Gather benchmarking data
- Exchange ideas

▶ Participate

- Engage with the presenters
- Join the discussion sessions today

▶ Learn Something New

- Business and Technical tracks

▶ Networking

Keynote Roadmap

- ▶ **Company Update**
- ▶ **PLM Market Update**
- ▶ **Aras News & Announcements**
- ▶ **Editorial: Be Different**

BE DIFFERENT

Aras Update

Company Momentum

- ▶ **12 year anniversary - March 2012**
- ▶ **4 years of double-digit growth**
- ▶ **Installations / month now > 800**
- ▶ **2011-Q4 was an all-time record**
- ▶ **2012-Q1 was 2.5x bigger than Q1-2011**
- ▶ **Now occupy 3x the office space we had last year**
- ▶ **Over 300 customers**
- ▶ **Hiring, hiring, hiring**
 - Product Management team increased 75% since ACE2011
 - Development team has increased 2x

Aras Update

Partner Highlights

Aras Community growth is powered by the strong support of the 85+ Aras Partners world-wide

▶ **Japanese Partners**

- Aggressive expansion in Auto, High Tech and Aerospace

▶ **T-Systems in Germany**

- 24 technical consultants trained
- CATIA Connector PDM Workbench product and others

▶ **Focus PLM in Italy**

- 2 more subscribers on-board last week
- Hardgoods/Furniture & Design

Aras Update

Partner Highlights

▶ **Minerva**

- Electronics High Tech vertical solution

▶ **vdR Group**

- Alcove9 Search Engine
- Joint development with Aras for add-ons

▶ **Integware**

- Life Sciences vertical solution

Many partners are here at ACE – meet them !

▶ We're expanding how we leverage the power of Aras Innovator ourselves

- Aras Website Content Management System (CMS)
- Community Project Site (our own 'Forge')
- Secure Subscriber Portal
- Partner Management System
- Online Training
- CRM & Marketing Automation
- Application Lifecycle Management (ALM) for our Software Dev
- Enterprise Asset Management (EAM)

▶ Why is this important?

- We use each release of Aras Innovator ourselves before you do

Market Update

Open Source Viability

5 years ago people asked:

- ▶ **Is open source a financially viable business model for enterprise software?**
- ▶ **Is PLM a big enough market to support Open Source?**

Market Update

Open Source Viability

- ▶ **Red Hat – largest enterprise open source company**
 - First to IPO
 - First to exceed \$1B revenues
 - Aras Subscription model similarities are purely coincidental
- ▶ **Anyone still wondering if a company can give away software and still make money?**

Michael Tiemann, RedHat VP “.. for every \$1 Red Hat sells, we have to displace \$10 of proprietary junk that never really worked in the first place”

Source: <http://blogs.computerworlduk.com/open-enterprise/2012/04/red-hats-billion-dollars-and-the-power-of-free-2/index.htm>

Market Update

PLM Market

- ▶ **Open Source and Cloud share a subscription-based pricing model which is forever changing software buying patterns**
- ▶ **We are hearing more often that legacy PLM vendors are discounting license fees to “\$0” to win business**
- ▶ **Rate of change in technology, business models, and better educated customers are changing the PLM landscape - legacy PLM’s will increasingly struggle to play a role**

What's New

Product Roadmap

► Products

- New Business Applications
- New Integration Frameworks
- New Social Tools / Visualization

Watch for Rob, John and Nate's sessions...

▶ Masahiko Hisatsugu - Aras President of Japan

- ~4 years ago he reached out to Aras as a partner
- Introduced Open Source PLM to the Japanese market
- Effective today! Aras Japan subsidiary incorporated

▶ Aras Japan hits the ground running with

- Customers already include: EPSON, Hitachi, Honda, Mitsubishi, Nissan, NOK, Sumitomo, Toshiba...
- Japanese language pack
- > 10 partners trained and ready
- Next stop: ACE 2012 Japan

What's New

SIG – the Community within the Community

▶ Integware will lead a Life Sciences SIG

- Define the suite of solutions needed for Life Sciences
- Drive Aras core roadmap features important to these solutions
- Create a forum to discuss business and PLM topics for compliance regulated industries

▶ Call to action – this is a great way to leverage the open PLM community – other SIG's? Yes

What's New Cloud

▶ Aras Spectrum on Microsoft Azure – Cloud PLM

- Development partnership with Microsoft
- Microsoft will perform load testing for massive database size and user counts to demonstrate the scalability of Aras technology and the Microsoft Azure cloud for mission critical PLM business applications
- Very interesting configuration scenarios are opened with Cloud and Open Source on-premise combined
- More Details coming today....

What's New Cloud

▶ How does Aras Spectrum fit with Aras product strategy

- Aras Innovator[®] enterprise open source PLM
- Aras EPLM[™] for SolidWorks Enterprise PDM
- Aras VPLM[™] for Autodesk Vault
- Aras Spectrum[™]
- Aras OEM Solutions with Partners

Aras Innovator **model-based SOA** technology framework is shared by all Aras products and OEM products

- aras
PLM
- aras
EPLM
- aras
VPLM
- aras
SPECTRUM
- AtosSphere PLM
- Nuage CATALYST

What's New

3D PDF Consortium

- ▶ **Aras Joined Consortium as a Founding Member**
- ▶ **Group of software companies, end-users, Adobe and standards bodies working together to define a roadmap for product information using PDF, and ensuring transparency in API, features, roadmaps, etc.**
- ▶ **Why did Aras join? If visualization, long term archiving, work instructions, supply chain management, etc. are important to you – then see ACE presentation 3D/2D Viewing, Mark-up & More**

What's New

Codex of PLM Openness

- ▶ **Sponsored by ProSTEP iViP and Automotive OEM's**
- ▶ **The Codex of PLM Openness (CPO) provides a basic understanding of the term “openness” and describes the associated requirements ...** <http://www.prostep.org/en/cpo.html>
- ▶ **The right to get your data back out, the right to integrate, the right to extend, and the right to replace without penalty**
- ▶ **Why did Aras join? This initiative aligns well with our core beliefs.**
 - In an industry that has thrived on lock-in, cancellation penalties, and control... Aras is committed to Open.

BEDIFFERENT

Aras's 2012 theme

- ▶ Don't be constrained by conventional wisdom, find the best solution
- ▶ Don't feel restricted to best practices, find what really works for your company
- ▶ Ignore the hype – and solve the real world problems
- ▶ Aras Technology approach is different
- ▶ Aras Business model is different
- ▶ Be Different

- ▶ I've visited a lot of companies with failed 2-3 year PLM projects, or even worse, the 3-year PLM “success” stories following the 10/10/100 Plan:
 - ✓ The number of end-users is 10% of the plan
 - ✓ The functionality is 10% of the plan
 - ✓ The cost is 100% over the plan
- ▶ As a PLM community, we must get past the hype and focus on delivering good systems

BEDIFFERENT

- ▶ **The Real World is more complex than a simple workflow**
- ▶ **The Real World changes faster than legacy software can adapt**
- ▶ **The Real World doesn't always fit in a box**
- ▶ **In the Real World, there is no meaningful way to evaluate a PLM product based only on 2 demo's**
- ▶ **In the Real World, paying up-front for more software than you need for the next 2-3 years, is unnecessarily risky**

<http://www.aras.com/company/commitment.aspx>

DIFFERENT IS...

- ▶ Realizing each company has unique and competitive data and processes.
- ▶ And developing software that adapts to fit these models, rather than expecting the business to adapt to fit the software.

DIFFERENT IS...

- ▶ Accepting that healthy companies change and they should. In fact, they should change frequently to grow, compete and improve.
- ▶ Technology should support real-time change and easy customization that regular people can use.

DIFFERENT IS...

- ▶ Enabling every company to try before they buy, and insisting that buying decisions are never made based on the word of a software salesman.

BEDIFFERENT

DIFFERENT IS...

- ▶ Giving companies control over their own destiny.
- ▶ This means never being locked in to proprietary solutions or restrictive licensing.

DIFFERENT IS...

- ▶ Allowing the company to own its data, with the freedom to access, share and extract it whenever they want, regardless of service level agreement.

DIFFERENT IS...

- ▶ Never accepting the status quo.

BE DIFFERENT.

BE DIFFERENT
