

How about carrying entire office in your pocket? How about using your PLM information right on manufacturing site and edit information in real time? How about making most advanced, open source enterprise PLM solution, even more advanced?

The most advanced enterprise PLM, **Aras** has finally transformed dreams into reality. The open source PLM is now available to be used on Mobile devices, so no licensing fees for Aras, with Mobile reach will add new dimension to your business, more over access to information in real time will help in increasing the quality, performance, efficiency and customer satisfaction.

You can now not just monitor the Aras, but you can also make edit/ change/ upload to the Aras, using your handheld devices, that too on the move. Now no need for the office to sit and work, you can actually use these data at the sites and can manage information within your device.

We promote open source Aras, and this a major step taken by **Porchys** to encourage open source PLM, with more advanced features. This is the revolutionary move in the archaic style of project management, as initially the entire framework was based on legacy system, and disadvantage is you can manage the information at PLM on your desktop machines or check work at manufacturing location, one at a time. Mobile PLM will allow you the manage information in real time, on the go, you can check with the Aras's scheduling, estimation reports, milestone scheduling, adding project specification, etc etc, list lasts very long with some of the unique features adding more user benefits to the current web system.

Our research and development team have identified new verticals which can be useful, some of them are even crucial for delivering quality product, in the current enterprise PLM system, which will prove to be more beneficial in terms of delivery, accuracy, productivity and customer satisfaction in design, Manufacturing, Designing, Engineering Services, Aerospace, Defense, Automotive, Power, Biotech, Medical, you name it we have the solutions for it. We have custom solution available based upon your industrial requirement.

So, still wondering? [Click here](#) to check out the Revolution!

Please contact us to know, a better solution for your industry's PLM need.
