

Aras PLM Essentials 11

Aras Training Seminar Description

Course

Aras PLM Essentials

Length

3 days

Format

Interactive combination of lectures, exercises, and labs

Attendees

Users that need to evaluate and understand how to use the Product Lifecycle Management applications included with Aras Innovator.

Description

This 3-day hands-on training course combines lectures, exercises, and labs to provide an introduction to the Aras Innovator Product Engineering and Program Management applications. Attendees will learn how to create and manage the revisions of Parts and Documents using the Aras Product Engineering application and define Project Schedules using Aras Program Management. Students will also share design ideas and drawing markups using Aras Visual Collaboration, manage Documents using the Aras Office Connector and create Self Service Reports.

Objectives

At the end of the course, participants will be able to:

- Navigate the Aras Innovator system and perform business item queries
- **NEW!** Locate items using extended classification and extended properties
- Set up new user accounts
- Create new Part and Document items and upload files
- Manage a Part BOM
- Release and Revise Parts and Documents using Engineering and Document Change Orders
- Create a Manufacturing Change Order (MCO) to edit an approved manufacturer list (AML)
- **NEW!** Use mass promote to move a collection of Parts through a life cycle
- Create a Project Template and execute a Project Schedule
- Collaborate on Part and Document content using Visual Collaboration
- **NEW!** Use the Aras Office Connector to manage and Microsoft Documents with Visual Collaboration
- Create and execute self-service reports

Prerequisites

Attendees should have an understanding of computer systems and enterprise applications.
