

Aras Innovator Administration

Aras Training Seminar Description

Course

Aras Innovator Administration

Length

2 day course

Format

Interactive combination of lectures, exercises, and labs

Attendees

People who need a basic overall system understanding

Description

The training course combines lectures, exercises, and labs to provide an introduction to administration of the Aras Innovator enterprise application framework and solutions. Attendees learn how to configure administrative items including forms, lifecycles and file vaults with hands-on exercises. Topics include user accounts and security permissions, and attendees receive a working knowledge of the creation of business items, relationships, and lifecycles.

Objectives

At the end of the course, participants will be able to:

- Administer the Aras Innovator system
- Set up user accounts with security permissions
- Create new business items and forms
- Manage item types and data properties
- Establish relationships and lifecycles for business items

Agenda

Day 1	Day 2
System Architecture	User Accounts
User Interface & Navigation	Security Permissions
Lists	Lifecycles
Item Types	Data Modeling
Forms	File Vault
Relationships	Structured Lab

Prerequisites

Participants should have an understanding of computer systems and enterprise applications
