

Aras Product Engineering

Aras Training Seminar Description

Course

Aras Product Engineering

Length

1 day course

Format

Interactive combination of lectures, exercises, and labs

Attendees

People who will use the solution

Description

The training course combines lectures, exercises, and labs to provide an understanding of how to work with the Aras Product Engineering solution. Attendees learn how to search, view, and print Bills of Material, parts and documents and work with business item lifecycles. Topics include approved vendor and manufacturer lists, and the course provides attendees with a working knowledge of the CMII-certified workflows for configuration and change management.

Objectives

At the end of the course, participants will be able to:

- Search, view, and print documents, parts and Bills of Material
- Check-in and check-out controlled files and business items
- Promote items through lifecycles
- Participate in change management workflow processes
- Review goals & scorecards and run reports

Agenda

Topics	
Solution Overview	Inbox and Assignments
Users, Identities, and Security Permissions	Tracking Goals, Estimates, and Actuals
Parts, Materials, and Bill of Material Structure	Alternates & Substitutes
Document Management	Approved Suppliers Status [AVL / AML]
Item Lifecycles	Dashboard Status & Reports
Change Management Workflows	Structured Lab

Prerequisites

Participants should have a basic understanding of part, document, and change management fundamentals
