Send Us Your Comments

Aras Corporation welcomes your comments and suggestions on the quality and usefulness of this document. Your input is an important part of the information used for future revisions.

- Did you find any errors?
- Is the information clearly presented?
- Do you need more information? If so, where and what level of detail?
- Are the examples correct? Do you need more examples?
- What features did you like most?

If you find any errors or have any other suggestions for improvement, indicate the document title, and the chapter, section, and page number (if available).

You can send comments to us in the following ways:

1 Overview

The Aras AI Assistant is designed to help users quickly and efficiently locate Aras product documentation and resources. By integrating AI technology, the Aras AI Assistant delivers a conversational interface that simplifies the process of finding accurate, relevant information whether you're an administrator, developer, or end-user.

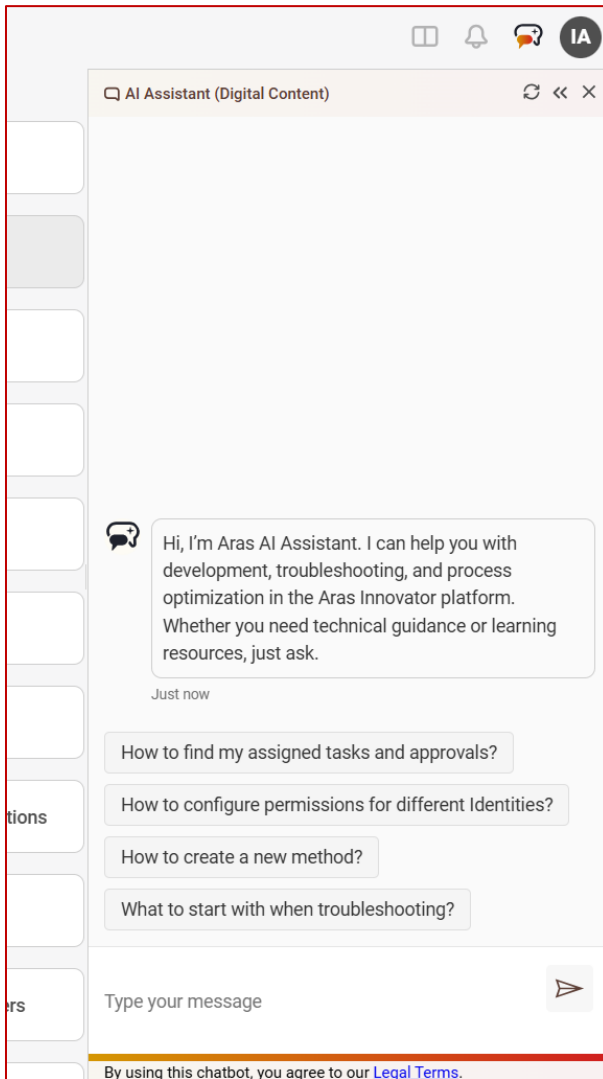

2 Getting Started

To access the Aras AI Assistant:

1. Click the **AI Chat** button on the top-right corner.

2. A chat panel will appear on the side of your screen.

3. Type your question or prompt in the message box and press **Enter**.

Note: If the chat does not open and you receive a warning message, contact your administrator. Access may be restricted based on permissions.

3 Writing Effective Prompts

The quality of the Aras AI Assistant’s responses depends heavily on how you frame your questions. Here are best practices for crafting prompts:

Be Clear and Specific

Define your objective explicitly. This ensures that the Aras AI Assistant understands exactly what you want to achieve, leading to more accurate and relevant responses. This could be generating content, answering a specific question, or providing a summary. The more specific you are, the better the Aras AI Assistant can understand and fulfill your request. Provide relevant context if needed to help the Aras AI Assistant better understand the prompt.

Use Action Verbs

Use strong verbs to guide the Aras AI Assistant’s response. Examples include:

- Act
- Analyze
- Categorize
- Classify
- Compare
- Create
- Define
- Evaluate
- Extract
- Find
- Generate
- Identify
- List
- Organize
- Recommend
- Rewrite
- Summarize
- Translate

Specify the Desired Output

Tell the Aras AI Assistant what you expect. Adding specific details in the prompt (through system or context prompting) can help the model to focus on what’s relevant, improving the overall accuracy.

3.1 Example Prompts

Goal	Effective Prompt
Understand a concept	“Define what an ItemType is in Aras Innovator.”
Retrieve step-by-step instructions	“List the steps to find my assigned tasks and approvals.”
Summarize documentation	“Summarize how to configure permissions for different identities.”

4 Responsible AI Filtering

If you receive the message “*The content was filtered due to Responsible AI restrictions.*”, this means the Aras AI Assistant has detected content that may conflict with ethical guidelines or responsible AI practices. Responsible AI restrictions help ensure ethical compliance, protect users from harmful content, and automatically filter out inappropriate or unsafe information to maintain a safe and positive experience.

5 Support and Feedback

If you encounter unexpected behavior, contact your administrator or contact Aras Support (support@aras.com) for review and assistance.
