If you would like a reply, please provide your name, email address, address, and telephone number.

If you have usage issues with the software, please visit <http://www.aras.com/support/>

Overview

This is a basic guide to verifying that a client machine is configured correctly for use with Aras Innovator.

It is limited in scope to the FireFox 24 ESR web browser client on the Windows operating system.

IMPORTANT: Version 24 Extended Support Release of FireFox is not the standard home user download.

<http://www.mozilla.org/en-US/firefox/organizations/>

The ESR version is intended for organizations that need to deploy FireFox, but want a greater amount of control on the schedule of the update process.

1 Client Configuration

1.1 Installed Software

Aras Innovator 10.0 requires the use of Mozilla FireFox version 24 ESR.

1.2 Required Settings

The following steps may require administrative rights to complete.

1. Open a new FireFox window and browse to Aras Innovator
2. The first time you connect to Aras Innovator, you will be prompted that Aras Innovator is attempting to run an add-on to FireFox. Select "Allow"

3. Next you will be prompted to install the add-on. Select "Install Now"

4. Once installed, you will be prompted to restart Firefox to initialize the add-on. Select "Restart Now"

5. Finally, you must permit the add-on to alter your FireFox settings to allow Aras Innovator access to your system for checking Files in and out of the system.

NOTE: This operation should only be done for trusted sites.

6. Finally, you should now be able to log into Aras Innovator

2 Troubleshooting

In this section, we will outline some of the common problems people can encounter with the setting up the client.

2.1 My pre-defined language pack and locale are not properly displaying when connected to Aras Innovator

The localization settings for the client are pulled from the "Languages" setting of Internet Explorer as opposed to the "Region and Language Settings" of the system. To change the language settings please refer to the steps below.

2.1.1 FireFox 24ESR for Windows

- 1) Open Firefox browser and go to Tools → Options
- 2) Select the Content Tab
 - a) In the Languages Box, click Choose

- 3) In the Languages Dialog Box
 - a) Click Select a language to add...
 - b) Select Japanese [ja]
 - c) Click Add
 - d) Move it to the top

- 4) Close the Browser
- 5) Login to Aras Innovator as admin/innovator
 - a) Confirm that Japanese Language is applied
